

This map shows the job access index provided by the U.S. Department of Housing and Urban Development (HUD) for the HUD Sustainable Communities grantees. This data is a special tabulation provided by HUD for purposes of this assessment. This data is available at the census block group level. This data is not assigned to the tract level.

This analysis is based on distance to all jobs, weighted more heavily for larger employment centers, and takes into consideration the number of workers in each block group. This map displays percentile rankings of each block group weighted by population. A higher percentile indicates greater job access in a block group, and vice versa.

The full range of data for each map has been divided into thirds to create low, medium, and high categories. A histogram is also included to show that the data is not necessarily distributed equally across these three categories.

Map date: 9/13/13 Map data: U.S. Census Bureau, HUD
 Caution: This map is based on imprecise source data, subject to change, and for general reference only. The work that provided the basis for this map was supported by funding under an award with the U.S. Department of Housing and Urban Development.
